PASS supports JCIDS -- enhances acquisition decisions
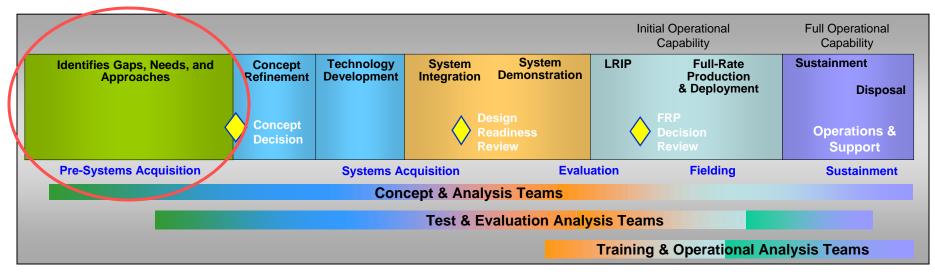

Consistent, integrated analysis :: critical to acquisition process

Initial Operational Capability | Full Operational Capability

Identifies Gaps, Needs, and Approaches

Concept Refinement — Concept Decision

Technology Development

System Integration | System Demonstration — Design Readiness Review

LRIP | Full-Rate Production & Deployment — FRP Decision Review

Sustainment | Disposal | Operations & Support

Pre-Systems Acquisition | Systems Acquisition | Evaluation | Fielding | Sustainment

Concept & Analysis Teams

Test & Evaluation Analysis Teams

Training & Operational Analysis Teams

PASS supports:

- Effects-based acquisition; continuous, unbiased analysis

- Early detection of potential performance barriers to intended mission capabilities prior to IOC/delivery

- Alignment of concept teams, test & evaluation teams, training commands, and operational units

- Organizational ability to effectively integrate and exchange "performance intelligence"

- End state: Better decisions, faster implementation, reduced cost, greater capability
